E-PSYCHIATRY

Contract with Mental Health Clinics, Hospitals and Other Mental Health Facilities

Telepsychiatry Solutions:

- More Freedom
- Reduce Your Overhead
- Outpatient and Emergency settings
- On-Demand Mental Health

Work With the Best in Telepsychiatry

e-Psychiatry offers psychiatrists and other mental health professionals a way to extend their areas of practice where clinics and hospitals are having difficulty staffing a psychiatrist full-time or part-time. Telepsychiatry, in recent years, has gained popularity and will become common practice. Many patients who try telepsychiatry, love it! e-Psychiatry can provide you with the tools and marketing you need to turn your home/office into a thriving telepsychiatry practice. We currently out rank all our competitors in Google and other search engines for terms related to "online psychiatrist" and "telepsychiatry". As a telemental health provider, you will be able to set your own rates, appointment times and can prescribe medication to patients as deemed necessary and conduct medication management. Additional services you can provide mental health facilities include the prescription, direction, and administration of psychotherapeutic treatments or medications to treat mental, emotional, or behavioral disorders.

e-Psychiatry contracts with mental health professionals to provide mental health clinics, hospitals, and other behavioral health facilities who have difficulty hiring an on-site provider by utilizing telepsychiatry. We provide full-time or part-time work and cover your malpractice. You will have the freedom to work from virtually anywhere! Candidates must possess good interpersonal communication and leadership skills and must be able to interact and collaborate with administrative, institutional, and medical staff remotely. Telemedicine experience and multiple board certifications and/or state licenses is a plus, but not required. Shifts and compensation vary by need, experience, and credentials.

OUR E-PSYCHIATRISTS

e-Psychiatry provides mental health facilities a way to connect with a psychiatrist or other mental health provider where it otherwise might not be possible.

e-Psychiatry combines the power of technology with the best in psychiatric care via telepsychiatry.

Emergency Care

e-Psychiatry specializes in providing emergency evaluations and care to its patients and partners. Emergency e-psychiatrists are able to immerse themselves in the fast paced emergency department or crisis center setting from the comfort of home. Emergency telepsychiatrists collaborate with the on-site professionals to provide comprehensive care that focuses on determining appropriate disposition.

Outpatient Care

e-Psychiatry's outpatient e-psychiatrists work regularly scheduled appointments and build lasting relationships with a consistent patient base. Outpatient e-psychiatrists work with a variety of behavioral health programs. Outpatient e-psychiatrists work with on-site professionals to fully intergrate behavioral health into the larger system of care of the facility and the community.

Benefits of e-Psychiatry

- Provide services to populations who may not otherwise have access to care
- Work from home
- Live anywhere
- No traveling or commuting
- Flexible schedules
- Malpractice Provided
